

MELISA OZYURT

SOFTWARE ENGINEER

ABOUT ME

A detail-driven Software Engineer specialising in building scalable, maintainable web applications. Proven ability to work across diverse projects, from single-purpose components to robust, mission-critical applications. Strong communicator and problem-solver, consistently delivering high-quality work within project deadlines. Confident in engaging with customers and translating requirements into technical solutions. Seeking new opportunities to leverage and expand my skills in a dynamic and challenging environment.

EXPERIENCE

2024 - Current

Career Break - Independent Travel

2020 - 2024

BAE Systems

Software Engineering Degree Apprentice

- Developed and maintained software solutions using Java within Agile teams, delivering reliable and maintainable code to agreed project objectives.
- Managed software requirements using IBM DOORS, ensuring clear documentation and traceability throughout development.
- Built and enhanced web applications using React, HTML, CSS and Tailwind CSS, with a strong focus on usability and user experience.
- During a project rotation, completely redesigned the application user interface in Figma, improving the overall user experience and design consistency.
- Performed manual and automated testing using Cypress, while using Git, Jira and Jenkins to support collaborative development and delivery processes.

2019 - 2020

BT Group

Software Engineer

- Conducted detailed impact assessments to evaluate the technical and business implications of new product requirements.
- Prepared and delivered presentations to key stakeholders, ensuring clear communication of project scope and outcomes.
- Collaborated with cross-functional teams to successfully launch new Pay-As-You-Go (PAYG) and Pay Monthly (PAYM) tariffs.

EDUCATION

2020 - 2023

University of Central
Lancashire

Bachelor of Science, Computer Software Engineering - First Class Honours

2020 - 2024

EAL Awards

Level 4 Diploma, Engineering and Advanced Manufacturing

2018 - 2019

BT FURTHER

Digital Intensive Program, Computer Software Engineering

2016 - 2018

Richard Huise College

BTEC Level 3 Extended Diploma, Computer Software Engineering - Triple Distinction *

PROFESSIONAL DEVELOPMENT

C5W

C5W-100 Introduction to Digital Forensic Course

earned foundational concepts, types of digital evidence, device categories, legal considerations, and common investigation challenges.
